

Dear Director of /establishment/ enterprise/ organization,

The Project Footprints (Pedas), which has been engaged for 5 years in the sector of informal environmental education, invites your organization to join and to respond to the action „**Environment is our common home**”.

An objective of this action is to offer an environmental education program to establishments and organizations.

The essence of the program is to educate the society in the environmental sector, for modern environmental problems become more and more topical and comprehension thereof and solutions are constantly necessary.

Plan of the program:

- Twice a year an establishment will hold for their employees discourses, which, in cooperation with the **Project Footprints** and **RTU „Environment Protection and Heat Systems Institute”** and its Head **Dagnija Blumberga, Professor**, will be prepared exactly for employees of your establishment;
- Once a year we will help you to arrange cleanup joint work or also render necessary information how to arrange such joint work in a better manner;
- At the turn of the year, on completion of the full course, i.e. two discourses and one joint work, they will receive certificates as a confirmation that they are “green – thinking” citizens and have acquired elementary education in the environmental sector;

In the result – constantly a larger part of the society will be educated in a necessary and understandable way on environmental problems that relate to each of us and to the society at the whole both on a global basis and on the level of every – day life (for example, why application of plastic bags should be reduced, how we are effected by global warming and how we can reduce in household the CO2 level, what does it mean to save resources etc.).

Should you be interested in cooperation and to help your employees to get educated in the environmental sector, please, write to e-mail:

pedas@pedas.lv

or tel. 29835605

With a view to your sympathy and understanding of necessity to spare our common environment and resources,

Sincerely Yours,
Vita Jaunzeme,
Project Footprints Leader
